

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Seventh Plymouth Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Seventh Plymouth Representative District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; less than one percent (502) of these admissions reside in the Seventh Plymouth Representative District. 3% (15) of admissions from the Seventh Plymouth Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Seventh Plymouth Representative District reported the following characteristics:

- 71% were male and 29% were female.
- 54% were between the ages of 30-49.
- 95% were white non-Latino, 2% were black non-Latino, 1% were Latino, and 2% were other racial categories.
- 60% were never married, 21% were married, and 19% reported not to be married now.
- 23% had less than high school education, 58% completed high school, and 19% had more than high school education.
- 48% were employed.
- 4% were homeless.
- 29% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 2 compares the proportional distribution of primary drugs in Massachusetts with that for the Seventh Plymouth Representative District.

Table 2					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	57%	19%	8%	6%	2%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 1 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 1 Annual Admissions by Substance Used: FY 1995 – FY 2002							
Seventh Plymouth Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	284	257	67	59	31	36	28
FY '96	279	247	71	62	28	30	28
FY '97	376	338	96	61	31	40	22
FY '98	430	374	116	93	42	61	42
FY '99	381	320	103	92	58	97	71
FY '00	453	383	132	113	47	102	78
FY '01	435	371	131	100	48	88	73
FY '02	502	387	148	120	58	123	86
